Examiner's Amendment

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicants, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

The application has been amended as follows:

Claims 9 and 10 have been cancelled as drawn to an invention nonelected without traverse in paper no. 6.

Examiner's Comment

Applicants' election of the invention of Group I, claims 1 and 2, in Paper No. 6 is acknowledged. For the reasons set forth in the Response of November 3, 2003, all of the claims in Groups II and III as grouped in paper no. 5, along with claims 11-18 submitted in the preliminary amendment filed with the present application, have been rejoined with the claims to the elected invention. Accordingly, claims 1-8 and 11-18 have been examined herein.

Art Unit 1713

Applicants' response did not, however, traverse the restriction requirement with respect to the subject matter of Group IV, claims 9 and 10 (note the second sentence of the November 3, 2003 Response), which claims are therefore treated as drawn to an invention nonelected **without** traverse (see MPEP 818.03(a)).

As this application is in condition for allowance except for the presence of claims 9 and 10, drawn to an invention non-elected without traverse, said claims have been cancelled by examiner's amendment.

Citation of Prior Art

The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.

Caye et al is cited to show mono(thio)(meth)acrylate monomers of generic formula $Y-X-C(O)-C(Z)=CH_2$ wherein X represents O or S and when X represents O, Y represents various heterocyclic moieties containing 2 or 3 sulfur atoms as set forth in column 2 and Table I of the patent. However, Caye et al does not show or suggest an acrylate compound as claimed; i.e., a compound wherein a thio(alkyl)acrylic acid residue or an (alkyl)acrylic acid residue is indirectly bonded, via a divalent organic group, to a 1,3-dithiolane ring at the 4-position and wherein when the (alkyl)acrylic acid residue is so bonded, the 1,3-dithiolane ring

Art Unit 1713

is substituted at the 2-position by an aromatic residue as per claim 1.

Kojima et al is cited to show analogous art relating to (meth)acrylic ester derivatives having a disulfide cyclic group (note col. 3, lines 14 et seq.).

Reasons for Allowance

The following is an Examiner's Statement of Reasons for Allowance:

The primary reason for allowing the claims is that an acrylic ester compound as defined by formula (1) in claim 1 is not disclosed nor fairly suggested in any prior art documents located or identified by the examiner as of the date of the Notice of Allowability. Claims 3-5 and 11-13, drawn to polymeric entities, incorporate through dependency all the structural limitations of the compound set forth in claim 1 or dependent claim 2, and therefore are deemed allowable on the same reasoning. Claims 6-8 and 14-18 are all method claims which fall within the scope of the rejoinder provisions of MPEP 821.04, in view of the allowability of the product (compound) claims.

Accordingly, claims 1-8 and 11-18 are deemed to define allowable subject matter and are passed to issue.

Application/Control No. 09/960,308

-5-

Art Unit 1713

Any comments considered necessary by applicants must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
